Exchange	CBOE
Index Ticker	HFLTTS

## Investment Objective

New Age Alpha's **AVDR US LargeCap Leading ETF** seeks to track the performance, before fees and expenses, to the New Age Alpha U.S. Large-Cap Leading 50 Index.

## Key Potential Benefits

- Seeks to avoid the losers™:** Investors think in terms of picking winners, when their goal should be seeking to avoid the losers™. AVDR aims to outperform by using the Human Factor to avoid the companies we feel are most likely to fail to deliver the growth implied by their stock price.
- We take what's good and aim to make it better:** Starting with a known investment universe, the S&P 500®, AVDR identifies and removes the 450 companies with the highest Human Factor score to create a portfolio of 50 stocks with the lowest Human Factor.
- A complement to US Large-Cap exposure:** Combining the alpha potential of active management with the advantages of rules-based investing, AVDR seeks to outperform existing large-cap benchmarks.

## The Human Factor

**AVDR US LargeCap Leading ETF (AVDR)** uses New Age Alpha's proprietary methodology, which is the process of using a probability, the Human Factor, to seek to avoid the losers.

Losers are the companies that we believe are most likely to fail to deliver the growth implied by their stock price.

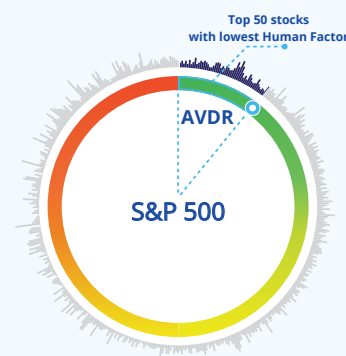

## ETF Construction

S&P 500® ▶ Liquidity Screens ▶ Remove High Human Factor ▶ AVDR

**New Age Alpha's AVDR US LargeCap Leading ETF (AVDR)** starts with the S&P 500® as its universe.

From there, we perform a liquidity screen. We then rank the components of the universe by Human Factor score and remove 450 stocks with the highest Human Factor scores resulting in a portfolio that consists of 50 stocks with the lowest Human Factor.

No more than 20 stocks in each sector are included in the portfolio. In addition, at the time of rebalance no sector weight can be 3% more than the corresponding sector in the S&P 500®.

## Performance

	3 Mo	YTD	1 Yr	3 Yr	5 Yr	10 Yr	Since Fund Inception (12/29/2020)	Since Index Launch Date (09/07/20)*
<b>AVDR at NAV</b>	<b>-0.48%</b>	<b>16.03%</b>	-	-	-	-	<b>17.24%</b>	-
AVDR at Market Price	-0.41%	16.10%	-	-	-	-	17.40%	-
<b>NAA U.S. Large-Cap Leading 50 Index</b>	<b>-0.37%</b>	<b>16.52%</b>	<b>28.41%</b>	-	-	-	<b>17.73%</b>	<b>29.38%</b>
S&P 500® Index	0.58%	15.92%	30.00%	-	-	-	16.85%	27.70%

\* Performance is calculated since 9/07/2020, the launch date of the New Age Alpha U.S. Large-Cap Leading 50 Index. The performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. For performance data current to the most recent month end, please visit [www.newagealphaetfs.com](http://www.newagealphaetfs.com) or by calling 888-449-7146.

High short term performance of the fund is unusual and investors should not expect such performance to be repeated. Returns for periods greater than one year are annualized. Market price returns are based upon the midpoint of the bid/ask spread at the close of the exchange and do not represent the returns you would receive if you traded shares at other times. The gross expenses for AVDR are 0.90% and are capped contractually at 0.60% until December 31, 2022. Cap excludes acquired fund fees and expenses, interest expense, trading expenses, taxes and extraordinary expense.

### Prospectus Offering

Investors should carefully consider the investment objectives, risks, charges and expenses of the New Age Alpha Funds. This and other important information about the Funds is contained in the prospectus, which can be obtained at [www.newagealphaetfs.com](http://www.newagealphaetfs.com) or by calling 888-559-7146. The prospectus should be read carefully before investing. The New Age Alpha Funds are distributed by Northern Lights Distributors, LLC, member FINRA/SIPC. Northern Lights Distributors, LLC is not affiliated with New Age Alpha Advisors, LLC.

### Performance Disclosure Language

The performance data quoted here represents past performance. Current performance may be lower or higher than the performance data quoted above. Investment return and principal value will fluctuate, so that shares, when redeemed, may be worth more or less than their original cost. Past performance is no guarantee of future results. For performance information current to the most recent month-end, please call toll-free 888-559-7146 or visit our website, [www.newagealphaetfs.com](http://www.newagealphaetfs.com)

### Important Risk Information

#### Risk Disclosure

The New Age Alpha Funds involve risks including the possible loss of principal and may not be suitable for all investors. There is no assurance that the fund will achieve its investment objectives. There is no assurance that the Advisor or index methodology will successfully identify and quantify the H-Factor methodology risk or which stocks have low or high H-Factor Scores. Errors and additional rebalances carried out by the Advisor with respect to the Index may increase the costs and market exposure risk of the Fund. The Fund is not 'actively' managed and maintaining investments regardless of market condition could lower Fund performance. Markets and equity securities can decline in value sharply and unpredictably, and in times of severe disruptions you could lose your entire investment.

The Fund has a limited number of intermediaries that act as authorized participants, and none of these authorized participants are or will be obligated to engage in creation or redemption transactions. Cash equivalents are not guaranteed as to principal or interest, and the Fund could lose money through these investments. The Fund may effect creations and redemptions in cash or partially in cash, which may be less tax-efficient than an investment in an ETF that distributes portfolio securities entirely in-kind. In following its methodology, the Index may be concentrated in securities of issuers operating in a single industry and the Fund will concentrate its investments to approximately the same extent. Investments in fixed-income instruments are subject to the possibility that interest rates could rise sharply, causing the value of the Fund's holdings and share price to decline.

The Fund is subject to the risk that large-capitalization securities may underperform other segments of the equity market or the equity market as a whole. The Fund's return may be uncorrelated and not match the return of the benchmark index. The Fund is non-diversified, which means it invests a high percentage of its assets in a limited number of securities. The Fund seeks to track a quantitative strategy index and the Fund invests in securities comprising an index created by a proprietary model. The success of the Fund's principal investment strategies depends on the effectiveness of the model. The value of a REIT can depend on the structure of and cash flow generated by the REIT. The Fund's investment return on repurchase agreements will depend on the counterparty's willingness and ability to perform its obligations. U.S. government securities are subject to the risks associated with fixed-income and debt securities, particularly interest rate risk and credit risk.

#### ETF Trading Disclosure

ETF shares are not redeemable with the issuing fund other than in large creation unit aggregations. Instead, investors must buy or sell ETF Shares in the secondary market. The NAV of the Fund's shares is calculated each day the national securities exchanges are open for trading, normally 4:00 p.m. Eastern time. Shares are bought and sold at market price not NAV. Market Price returns are based upon the official closing price on the listing exchange at 4:00 p.m. ET when NAV is normally determined for most Funds, and do not represent the returns you would receive if you traded shares at other times.

An active secondary market for the Fund's shares may not exist. Although the Fund's shares will be listed on an exchange, it is possible that an active trading market may not develop or be maintained. There is no guarantee that distributions will be paid.
